Code:

```
#include "Ultrasonic.h" Ultrasonic
ultrasonic(12, 13); int distance;

void setup() {
  Serial.begin(9600);
}

void loop() {
  // Pass INC as a parameter to get the distance in inches
  distance = ultrasonic.read(CM);
  Serial.print("Distance in CM: ");
  Serial.println(distance);
  if (distance < 100)
    Serial.print("alert");
  Serial.println();
  delay(1000);
}
```

Output:

The screenshot displays the Wokwi IDE interface. On the left, the 'sketch.ino' file contains the following code:

```
1 #include "Ultrasonic.h"
2 Ultrasonic ultrasonic(12, 13);
3 int distance;
4
5 void setup() {
6   Serial.begin(9600);
7 }
8
9 void loop() {
10   // Pass INC as a parameter to get the distance in inches
11
12   distance = ultrasonic.read(CM);
13
14   Serial.print("Distance in CM: ");
15   Serial.println(distance);
16   if (distance < 100)
17     Serial.print("alert");
18   Serial.println();
19   delay(1000);
20 }
21
```

On the right, the 'Simulation' tab shows a virtual Arduino Uno board with an ultrasonic sensor module connected. Below the simulation, the serial monitor output is displayed:

```
Distance in CM: 30
alert
Distance in CM: 113
Distance in CM: 113
Distance in CM: 113
```
